## **About Megacles and the Cylon Affair**

In 632 BCE, an Athenian noble and prior victor at the Olympic Games, Cylon, instituted a coup to seize control of the city of Athens. Cylon and his compatriots had intended to overthrow Athens' democratic government and establish a tyrannical dictatorship. However, they were ultimately defeated, and their rebellion was suppressed. After Cylon and his conspirators sought and obtained sanctuary, Megacles, a ruler of Athens, deceived them into surrendering sanctuary by making false promises and that deception ultimately led to Cylon's death. Megacles was put on trial for his deception, albeit in pursuit of noble goals. What issues and ethical concerns does this ancient event present and how does it reflect modern day problems for lawyers?
